- Basic speaking abilities in Spanish
- Interests include human computer interaction, social psychology, mobile technology

For PheCole: things I like to do: spend time outside, camp, teach inside and outside of the gym, try new foods, boardgames, kick back with family and good food, go on walks.

In terms of leadership roles, being team captain at my previous gym is pretty much my only credible title. But even before that position I spent the previous 3 or 4 years almost as a parent figure for the younger kids on my original team at the park district of Oak Park. Being the oldest gymnast on the team I was the only guy the younger team boys could look up to as a role model and I was frequently put in the position of giving advice and encouragement. From this foundation, plus going through my own struggles with the sport that included not just stress but even depression, really set up me for the being the best leader I could when I moved gyms in high school. This time around I was less like a parent figure for littler kids and more like a counselor for the guys just a year or two younger than me that were working through many of the same anxieties and emotions I had just gone through – whether they were related to the gym, family, or social life. Furthermore, I realized that being approachable for other guys on the team could be just as therapeutic for me as it was for them. And that's kind of how I got into the idea of talking and sharing as a way of healing which is one of the things I'd like to share as a Phe.

I realize that was kind of long winded but I hope it helps a little.
